Sustainable Development Goals

SDG	Goal Title	Mapping Domain
SDG 1	No Poverty	Data analytics, AI, and mobile technologies to deliver financial inclusion, aid distribution, and policy planning.
SDG 2	Zero Hunger	IoT and AI for precision agriculture, crop monitoring, and food distribution optimization.
SDG 3	Good Health and Well-being	Health informatics, AI in diagnostics, wearable technologies, and telemedicine platforms.
SDG 4	Quality Education	E-learning platforms, AI-driven personalized learning, MOOCs, and inclusive digital education solutions.
SDG 5	Gender Equality	Tech-enabled platforms to empower women, promote inclusivity, and eliminate gender bias in algorithms.
SDG 6	Clean Water and Sanitation	IoT systems for water quality monitoring, smart grids for sanitation infrastructure.
SDG 7	Affordable and Clean Energy	Smart grid technologies, energy forecasting using AI, and optimization algorithms for energy management.
SDG 8	Decent Work and Economic Growth	Automation, digital platforms for remote work, and upskilling via online learning platforms.
SDG 9	Industry, Innovation, and Infrastructure	Development of intelligent systems, robotics, IoT, and scalable cloud infrastructures.
SDG 10	Reduced Inequalities	Accessible tech, language translation tools, and inclusive design for marginalized communities.
SDG 11	Sustainable Cities and Communities	Smart city solutions, traffic optimization, urban planning via GIS and AI technologies.
SDG 12	Responsible Consumption and Production	Block-Chain for supply chain transparency, optimization algorithms for resource management.
SDG 13	Climate Action	AI and big data for climate modeling, environmental monitoring systems using IoT sensors.
SDG 14	Life Below Water	Remote sensing, data science for marine biodiversity and pollution tracking.
SDG 15	Life on Land	AI for wildlife monitoring, satellite image processing, deforestation tracking with computer vision.
SDG 16	Peace, Justice and Strong Institutions	Cybersecurity, e-Governance platforms, block-chain for transparent systems, digital forensics.

SDG 17	Partnerships for the Goals	Open-source collaboration, global research networks, cloud-based development environments.
